ISM Working Group

Promoting "Excellence" in the Development, Implementation and Validation of Integrated Safety Management Programs and Processes.

Objectives include:

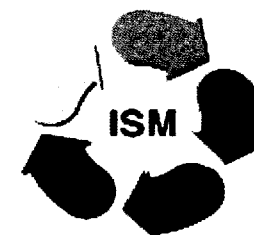

- Active exchange of successful contractor ISM programs, practices, lessons learned
- Promoting awareness and understanding of ISM Functions and Principles
- Facilitating integration of Environmental, Safety and Health (ES&H) processes and practices within the framework of ISM
- Identifying "Best Practices" to support cost-effective and accelerated implementation of ISM processes and programs
- Providing coordinated contractor input to DOE on topics such as:
 - Assessment Processes
 - Causal Analysis
 - Corrective Action Processes
 - Environmental
 - Human Performance
 - Industrial Hygiene/Industrial Safety
 - Occupational Medicine
 - Occurrence Reporting
 - Operating Experience Review
 - Performance Metrics/Analysis
 - Quality Assurance
 - Radiation Protection

Integrated Safety Management Working

Energy Facility Contractors Group

Promoting "Excellence" in all aspects of operation and management of DOE Facilities in a safe, environmentally sound, efficient, and cost effective manner through:

- Active exchange of successful programs, practices, procedures, and lessons learned among DOE contractors.
- Active exchange of management and technical information.
- Active sponsorship and participation in Working Group, Workshops and Conferences.
- Effectively interfacing with external organizations (e.g. INPO, NLIC, DNFSB, etc.) to minimize duplication exchange information and promote cooperation among all groups.

ISM Functions

- Define Scope of Work
- Analyze the Hazards
- Develop and Implement Controls
- Perform the Work
- Feedback and Improvement

ISM Principles

- Line Management Responsibility for Safety
- Clear Roles and Responsibilities
- Competence Commensurate with Responsibilities
- Balanced Priorities
- Identification of Safety Standards and Requirements
- Hazard Controls Tailored to the Work Being Performed
- Operations Authorization
